The Future of Photovoltaic Manufacturing in the United States Charles W. Wessner, Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives, Technology, and Economic Policy Board on Science, Division on Earth and Life Studies, National Research Council

Technological innovation and growth are critical to U.S. competitiveness in a global economy. One means of facilitating growth and improving competitiveness is to foster more robust innovation ecosystems through the development of public-private partnerships, industry consortia, and other regional and national economic development initiatives. Public-private partnerships, in particular, catalyze the commercialization of state and national investments in research and development.

One of the major projects of the National Research Council's Board on Science Technology and Economic Policy (STEP) is to examine state and local investment programs designed to attract and grow knowledge-based industries. STEP analyzes state and regional innovation initiatives to gain a better understanding of the challenges associated with the transition of research into products, the practices associated with successful state and regional programs, and their interaction with federal programs and private initiatives. In April and July 2009, STEP convened two meetings to assess the future of the U.S. photovoltaic industry and the practical steps that the federal government and some state and regional governments are taking to develop the capacity to manufacture photovoltaics competitively.

The Future of Photovoltaic Manufacturing in the United States captures the presentations and discussions of these meetings. This report explores the prospects for cooperative R&D efforts, standards, and roadmapping efforts that could accelerate innovation and growth of a U.S. photovoltaics industry. It includes both efforts to strengthen existing industries as well as specific new technology focus areas such as nanotechnology, stem cells, and energy in order to gain an improved understanding of program goals, challenges, and accomplishments.

From reader reviews:

Hilda Dumas:

Now a day those who Living in the era wherever everything reachable by interact with the internet and the resources in it can be true or not involve people to be aware of each facts they get. How many people to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Reading a book can help men and women out of this uncertainty Information especially this The Future of Photovoltaic Manufacturing in the United States book as this book offers you rich data and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

Irene Parker:

Information is provisions for folks to get better life, information currently can get by anyone with everywhere. The information can be a understanding or any news even restricted. What people must be consider while those information which is from the former life are challenging to be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you receive the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take The Future of Photovoltaic Manufacturing in the United States as the daily resource information.

Annamarie Hernandez:

Spent a free a chance to be fun activity to do! A lot of people spent their leisure time with their family, or their friends. Usually they performing activity like watching television, planning to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your own free time/ holiday? Might be reading a book might be option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled The Future of Photovoltaic Manufacturing in the United States can be fine book to read. May be it might be best activity to you.

Myra McKenzie:

In this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple approach to have that. What you need to do is just spending your time very little but quite enough to experience a look at some books. Among the books in the top collection in your reading list is actually The Future of Photovoltaic Manufacturing in the United States. This book which can be qualified as The Hungry Slopes can get you closer in turning into precious person. By looking right up and review this reserve you can get many advantages.
