## Perceiving in Depth, Volume 3: Other Mechanisms of Depth Perception (Oxford Psychology Series)

Ian P. Howard

The three-volume work *Perceiving in Depth* is a sequel to *Binocular Vision* and *Stereopsis* and to *Seeing in Depth*, both by Ian P. Howard and Brian J. Rogers. This work is much broader in scope than the previous books and includes mechanisms of depth perception by all senses, including aural, electrosensory organs, and the somatosensory system. Volume 1 reviews sensory coding, psychophysical and analytic procedures, and basic visual mechanisms. Volume 2 reviews stereoscopic vision. Volume 3 reviews all mechanisms of depth perception other than stereoscopic vision. The three volumes are extensively illustrated and referenced and provide the most detailed review of all aspects of perceiving the three-dimensional world.

Volume 3 addresses all depth-perception mechanisms other than stereopsis. The book starts with an account of monocular cues to depth, including accommodation, vergence eye movements, perspective, interposition, shading, and motion parallax. A chapter on constancies in depth perception, such as the ability to perceive the sizes and shapes of objects as they move or rotate in depth, is followed by a chapter on the ways in which depth cues interact. The next chapter reviews sources of information, such as changing disparity, image looming, and vergence eye movements, used in the perception of objects moving in depth. Various pathologies of depth perception, including visual neglect, stereoanomalies, and albanism are reviewed. Visual depth-perception mechanisms through the animal kingdom are described, starting with insects and progressing through crustaceans, fish, amphibians, reptiles, birds, and mammals. The chapter includes a discussion of how stereoscopic vision may have evolved. The next chapter describes how visual depth perception is used to guide reaching movements of the hand, avoiding obstacles, and walking to a distant object. The next three chapters review non-visual mechanisms of depth perception. Auditory mechanisms include auditory localization, echolocation in bats and marine mammals, and the lateral-line system of fish. Some fish emit electric discharges and then use electric sense organs to detect distortions of the electric field produced by nearby objects. Some beetles and snakes use heat-sensitive sense organs to detect sources of heat. The volume ends with a discussion of mechanisms used by animals to navigate to a distant site. Ants find their way back to the nest by using landmarks and by integrating their walking movements. Several animals navigate by the stars or by polarized sunlight. It seems that animals in several phyla navigate by detecting the Earth's magnetic field.

### **From reader reviews:**

#### **Paulette Stoneman:**

Reading a publication tends to be new life style in this era globalization. With studying you can get a lot of information that could give you benefit in your life. Along with book everyone in this world may share their idea. Guides can also inspire a lot of people. A great deal of author can inspire all their reader with their story or maybe their experience. Not only the storyplot that share in the textbooks. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write to the book. One of them is this Perceiving in Depth, Volume 3: Other Mechanisms of Depth Perception (Oxford Psychology Series).

#### **Clarence Liller:**

The publication with title Perceiving in Depth, Volume 3: Other Mechanisms of Depth Perception (Oxford Psychology Series) contains a lot of information that you can find out it. You can get a lot of profit after read this book. That book exist new understanding the information that exist in this e-book represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This book will bring you with new era of the internationalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.

#### **William Pak:**

The particular book Perceiving in Depth, Volume 3: Other Mechanisms of Depth Perception (Oxford Psychology Series) has a lot of knowledge on it. So when you check out this book you can get a lot of profit. The book was authored by the very famous author. Mcdougal makes some research prior to write this book. This kind of book very easy to read you can find the point easily after looking over this book.

#### **Dianne Janelle:**

In this period of time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. Typically the book that recommended to you personally is Perceiving in Depth, Volume 3: Other Mechanisms of Depth Perception (Oxford Psychology Series) this e-book consist a lot of the information on the condition of this world now. That book was represented how does the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. Often the writer made some analysis when he makes this book. Here is why this book ideal all of you.
