1658 Deaths: Oliver Cromwell Leontine Cervantes

What's so special about Oliver Cromwell? In this new, compelling book from author Leontine Cervantes, find out more about Oliver Cromwell ... Oliver Cromwell was an English military and political leader who was part of the joint republican, military and parliamentary effort that overthrew the Stuart monarchy as a result of the English Civil War, and was subsequently invited by his fellow leaders to assume a head of state role in 1653. As such, Cromwell ruled as "Lord Protector" for a five-year segment of the 11-year period of republican Commonwealth and protectorate rule of England, and nominally of Ireland, Wales and Scotland. As one of the commanders of the New Model Army, he played an important role in the defeat of the King's forces, the royalists in the English Civil War. After the execution of King Charles I in 1649, Cromwell dominated the short-lived Commonwealth of England, conquered Ireland and Scotland, ruling as Lord Protector from 1653 until his death in 1658. Cromwell was born into the ranks of the middle gentry, and remained relatively obscure for the first 40 years of his life. Along with his brother, Henry, he kept a small holding of chickens and sheep, selling eggs and wool to support himself. His lifestyle resembled that of a yeoman farmer until he received an inheritance from his uncle. After undergoing a religious conversion during the same decade, Cromwell made an independent style of puritanism an essential part of his life. He took a generally tolerant view towards the many Protestant sects of his period. As a ruler he executed an aggressive and effective foreign policy and did as much as any English leader to shape the future of the land he governed. But his Commonwealth collapsed after his death and the royal family was restored in 1660. An intensely religious man??a self-styled Puritan Moses ??? he fervently believed God was guiding his victories. He was elected Member of Parliament for Huntingdon in 1628 and for Cambridge in the Short and Long Parliaments. He entered the English Civil War on the side of the "Roundheads" or Parliamentarians and became a key military leader. Nicknamed "Old Ironsides", he was quickly promoted from leading a single cavalry troop to become one of the principal commanders of the army. In 1649 he was one of the signatories of Charles I's death warrant and was a member of the Rump Parliament, which selected him to take command of the English campaign in Ireland during 1649??50. He led a campaign against the Scottish army between 1650 and 1651. On 20 April 1653 he dismissed the Rump Parliament by force, setting up a short-lived nominated assembly known as the Barebones Parliament, before being made Lord Protector of England, Wales, Scotland and Ireland on 16 December 1653. He was buried in Westminster Abbey. After the Royalists returned to power, they had his corpse dug up, hung in chains, and beheaded. So, what separates this book from the rest?
