National Infrastructure Protection Plan: Homeland Security Program for Protecting Critical Infrastructure and Key Resources from Terrorism, Natural Disasters, and Emergencies Department of Homeland Security, U.S. Government

This document from the Department of Homeland Security -the National Infrastructure Protection Plan, or NIPP - unifies protective plans against terrorism, natural disasters, and emergencies for critical infrastructure and key resources (CIKR). Contents include threats, special considerations, authorities, roles and responsibilities, strategy, managing risk, assessing risk, prioritization, effectiveness, regional coordination, information sharing, and much more. The National Infrastructure Protection Plan provides the unifying structure for the integration of a wide range of efforts for the enhanced protection and resiliency of the nation's critical infrastructure and key resources (CIKR) into a single national program.

Eighteen sectors are covered by the NIPP: Agriculture and Food, Defense Industrial Base, Energy, Healthcare and Public Health, National Monuments and Icons, Banking and Finance, Water, Chemical, Commercial Facilities, Critical Manufacturing, Dams, Emergency Services, Nuclear Reactors-Materials-Waste, Information Technology, Communications, Postal and Shipping, Transportation Systems, Government Facilities.

The overarching goal of the NIPP is to build a safer, more secure, and more resilient America by preventing, deterring, neutralizing, or mitigating the effects of deliberate efforts by terrorists to destroy, incapacitate, or exploit elements of our nation's CIKR and to strengthen national preparedness, timely response, and rapid recovery of CIKR in the event of an attack, natural disaster, or other emergency. The 2009 NIPP replaces the 2006 version and reflects changes and updates to program elements and concepts. It captures the evolution and maturation of the processes and programs first outlined in 2006 without changing the underlying policies. The revised NIPP integrates the concepts of resiliency and protection, and broadens the focus of NIPP-related programs and activities to an all-hazards environment. The plans are carried out in practice by an integrated network of Federal departments and agencies, State and local government agencies, private sector entities, and a growing number of regional consortia all operating together within a largely voluntary CIKR protection framework. This multidimensional public-private sector partnership is the key to success in this inherently complex mission area. Building this partnership under the NIPP has been a major accomplishment to date and has facilitated closer cooperation and a trusted relationship in and across the 18 CIKR sectors. Integrating multi-jurisdictional and multi-sector authorities, capabilities, and resources in a unified but flexible approach that can also be tailored to specific sector and regional risk landscapes and operating environments is the path to successfully enhancing our Nation's CIKR protection. The NIPP meets the requirements that the President set forth in Homeland Security Presidential Directive 7 (HSPD-7), Critical Infrastructure Identification, Prioritization, and Protection.

This is a privately authored news service and educational publication of Progressive Management. Our publications synthesize official government information with original material - they are not produced by the federal government. They are designed to provide a convenient user-friendly reference work to uniformly

present authoritative knowledge that can be rapidly read, reviewed or searched. Vast archives of important data that might otherwise remain inaccessible are available for instant review no matter where you are. This e-book format makes a great reference work and educational tool. There is no other reference book that is as convenient, comprehensive, thoroughly researched, and portable - everything you need to know, from renowned experts you trust. For over a quarter of a century, our news, educational, technical, scientific, and medical publications have made unique and valuable references accessible to all people.
