Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series)

Mark D. Rothmann, Brian L. Wiens, Ivan S.F. Chan

Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) Mark D. Rothmann, Brian L. Wiens, Ivan S.F. Chan

The increased use of non-inferiority analysis has been accompanied by a proliferation of research on the design and analysis of non-inferiority studies. Using examples from real clinical trials, **Design and Analysis of Non-Inferiority Trials** brings together this body of research and confronts the issues involved in the design of a non-inferiority trial. Each chapter begins with a non-technical introduction, making the text easily understood by those without prior knowledge of this type of trial.

Topics covered include:

- A variety of issues of non-inferiority trials, including multiple comparisons, missing data, analysis population, the use of safety margins, the internal consistency of non-inferiority inference, the use of surrogate endpoints, trial monitoring, and equivalence trials
- Specific issues and analysis methods when the data are binary, continuous, and time-to-event
- The history of non-inferiority trials and the design and conduct considerations for a non-inferiority trial
- The strength of evidence of an efficacy finding and how to evaluate the effect size of an active control therapy

A comprehensive discussion on the purpose and issues involved with non-inferiority trials, **Design and Analysis of Non-inferiority Trials** will assist current and future scientists and statisticians on the optimal design of non-inferiority trials and in assessing the quality of non-inferiority comparisons done in practice.

From reader reviews:

James Bardsley:

Information is provisions for those to get better life, information presently can get by anyone in everywhere. The information can be a expertise or any news even a huge concern. What people must be consider while those information which is within the former life are challenging be find than now could be taking seriously which one would work to believe or which one the resource are convinced. If you get the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen throughout you if you take Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) as the daily resource information.

Patricia Howard:

Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) can be one of your nice books that are good idea. We recommend that straight away because this guide has good vocabulary that will increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to place every word into enjoyment arrangement in writing Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) although doesn't forget the main place, giving the reader the hottest and based confirm resource facts that maybe you can be considered one of it. This great information could drawn you into new stage of crucial considering.

Maria Saad:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book had been rare? Why so many problem for the book? But just about any people feel that they enjoy for reading. Some people likes examining, not only science book but in addition novel and Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) or others sources were given knowledge for you. After you know how the great a book, you feel want to read more and more. Science e-book was created for teacher as well as students especially. Those publications are helping them to increase their knowledge. In various other case, beside science publication, any other book likes Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) to make your spare time much more colorful. Many types of book like this one.

Alan Robert:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information from a book. Book is published or printed or illustrated from each source that will filled update of news. On this modern era like right now, many ways to get information are available for an individual. From media social like newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just seeking

the Design and Analysis of Non-Inferiority Trials (Chapman & Hall/CRC Biostatistics Series) when you essential it?
