Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics

Lauren Pecorino

Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics Lauren Pecorino

Cells in our body undergo tightly regulated replication to enable growth to occur in a precise, and to ensure that damaged or worn out tissues are replaced. Regulation is mediated via many different mechanisms; it is when these mechanisms fail, and regulation is lost, that cancer can result. Recent advances in molecular cell biology have greatly expanded our understanding of the processes and mechanisms that underpin the regulation of cell replication, and what is happening at the molecular level when these fail.

The third edition of *The Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics* offers a fresh approach to the study of the molecular basis of cancer, by showing how our understanding of the defective mechanisms that drive cancer is leading to the development of new targeted therapeutic agents.

Opening with an overview of the key hallmarks of cancer as a disease state, the book then leads us through the principal processes that become altered in cancer cells, and explains how the failure of these processes can lead to the onset of cancer.

Uniquely, within each chapter, students are shown how this molecular knowledge is being applied to develop new targeted therapeutic strategies.

Written with students in mind, the book features a variety of learning features to help students engage with, and master, the concepts presented. The emphasis is not on exhaustive coverage of the field, but on acquiring a solid understanding of the essentials of the subject--and an appreciation of how a theoretical understanding can be transformed into therapeutic benefit.

The Molecular Biology of Cancer is an invaluable resource for any student wishing to gain an insight into the molecular basis of the disease--and uncover possible solutions for its effective control.

COMPANION WEBSITE (www.oup.com/uk/orc/bin/9780199577170)

For students:

- * Hyperlinks to primary literature articles featured in the text
- * News feeds relevant to cancer biology, drawn from a variety of publications
- * A web link library, giving access to relevant online resources

For instructors:

- * Downloadable figures from the book
- * A Test Bank of questions, with feedback linked to the book, for use in formative or summative assessment (password-protected)

From reader reviews:

Karl Harms:

The book Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics make you feel enjoy for your spare time. You need to use to make your capable much more increase. Book can to become your best friend when you getting anxiety or having big problem with your subject. If you can make examining a book Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics being your habit, you can get more advantages, like add your own capable, increase your knowledge about some or all subjects. You are able to know everything if you like wide open and read a publication Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics. Kinds of book are a lot of. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this reserve?

Dorothy Roper:

This Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is actually information inside this book incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. This kind of Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics without we know teach the one who studying it become critical in imagining and analyzing. Don't be worry Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics can bring if you are and not make your handbag space or bookshelves' turn out to be full because you can have it with your lovely laptop even cell phone. This Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics having excellent arrangement in word and layout, so you will not really feel uninterested in reading.

Rose Watkins:

Hey guys, do you desires to finds a new book to read? May be the book with the title Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics suitable to you? The particular book was written by popular writer in this era. The particular book untitled Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics is the main one of several books in which everyone read now. This specific book was inspired many people in the world. When you read this publication you will enter the new dimension that you ever know prior to. The author explained their thought in the simple way, thus all of people can easily to be aware of the core of this book. This book will give you a lot of information about this world now. To help you to see the represented of the world on this book.

Brandy Godwin:

Is it a person who having spare time and then spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics can be the answer, oh how comes? The new book you know. You are consequently out of date, spending your free time by reading in this brand-new era is common not a nerd

activity. So what these ebooks have than the others?
