Natural Language Annotation for Machine Learning

James Pustejovsky, Amber Stubbs

Natural Language Annotation for Machine Learning James Pustejovsky, Amber Stubbs

Create your own natural language training corpus for machine learning. Whether you're working with English, Chinese, or any other natural language, this hands-on book guides you through a proven annotation development cycle—the process of adding metadata to your training corpus to help ML algorithms work more efficiently. You don't need any programming or linguistics experience to get started.

Using detailed examples at every step, you'll learn how the *MATTER Annotation Development Process* helps you **Model, Annotate, Train, Test, Evaluate, and Revise** your training corpus. You also get a complete walkthrough of a real-world annotation project.

- Define a clear annotation goal before collecting your dataset (corpus)
- Learn tools for analyzing the linguistic content of your corpus
- Build a model and specification for your annotation project
- Examine the different annotation formats, from basic XML to the Linguistic Annotation Framework
- Create a gold standard corpus that can be used to train and test ML algorithms
- Select the ML algorithms that will process your annotated data
- Evaluate the test results and revise your annotation task
- Learn how to use lightweight software for annotating texts and adjudicating the annotations

This book is a perfect companion to O'Reilly's *Natural Language Processing with Python*.

From reader reviews:

Johnnie Santiago:

This book untitled Natural Language Annotation for Machine Learning to be one of several books which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this particular book in the book retail outlet or you can order it via online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Cell phone. So there is no reason for you to past this guide from your list.

James Baker:

The book Natural Language Annotation for Machine Learning will bring that you the new experience of reading a book. The author style to elucidate the idea is very unique. If you try to find new book to study, this book very acceptable to you. The book Natural Language Annotation for Machine Learning is much recommended to you to study. You can also get the e-book from the official web site, so you can quickly to read the book.

Ophelia Ellis:

A lot of people always spent their particular free time to vacation or go to the outside with them household or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or playing video games all day long. In order to try to find a new activity that is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you read you can spent all day long to reading a publication. The book Natural Language Annotation for Machine Learning it is extremely good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. Should you did not have enough space to develop this book you can buy the actual e-book. You can m0ore simply to read this book from your smart phone. The price is not very costly but this book has high quality.

Pamela Postma:

Many people spending their time by playing outside along with friends, fun activity together with family or just watching TV all day long. You can have new activity to invest your whole day by reading through a book. Ugh, ya think reading a book will surely hard because you have to take the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smart phone. Like Natural Language Annotation for Machine Learning which is getting the e-book version. So , why not try out this book? Let's notice.
