The Hilbert scheme $X^{[n]}$ of a surface X describes collections of n (not necessarily distinct) points on X . More precisely, it is the moduli space for 0 -dimensional subschemes of X of length n . Recently it was realized that Hilbert schemes originally studied in algebraic geometry are closely related to several branches of mathematics, such as singularities, symplectic geometry, representation theory-even theoretical physics. The discussion in the book reflects this feature of Hilbert schemes. For example, a construction of the representation of the infinite dimensional Heisenberg algebra (i.e., Fock space) is presented. This representation has been studied extensively in the literature in connection with affine Lie algebras, conformal field theory, etc. However, the construction presented in this volume is completely unique and provides the unexplored link between geometry and representation theory. The book offers a nice survey of current developments in this rapidly growing subject. It is suitable as a text at the advanced graduate level.

From reader reviews:

Gary Kruse:

Here thing why this specific Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series) are different and trustworthy to be yours. First of all examining a book is good nonetheless it depends in the content of the usb ports which is the content is as scrumptious as food or not. Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series) giving you information deeper including different ways, you can find any reserve out there but there is no e-book that similar with Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series). It gives you thrill looking at journey, its open up your own personal eyes about the thing this happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your method home by train. Should you be having difficulties in bringing the published book maybe the form of Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series) in e-book can be your option.

Marie Avis:

Information is provisions for people to get better life, information presently can get by anyone in everywhere. The information can be a information or any news even an issue. What people must be consider while those information which is inside former life are challenging be find than now's taking seriously which one is suitable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen in you if you take Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series) as the daily resource information.

Tiffany Serna:

Playing with family in a park, coming to see the ocean world or hanging out with close friends is thing that usually you will have done when you have spare time, and then why you don't try matter that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series), you may enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout guys. What? Still don't understand it, oh come on its known as reading friends.

Kendrick Hardee:

A lot of e-book has printed but it is different. You can get it by web on social media. You can choose the top book for you, science, witty, novel, or whatever through searching from it. It is called of book Lectures on Hilbert Schemes of Points on Surfaces (University Lecture Series). You'll be able to your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make you happier to read. It is most crucial that, you must aware about reserve. It can bring you from one location to other place.
