A Walk Through Time: From Stardust to Us--The Evolution of Life on Earth Sidney Liebes, Elisabet Sahtouris, Brian Swimme

Fifteen Billion Years in the Life . . . A breathtaking, vibrantly illustrated history of the universe. "A valuable new way to conceive of the immensity of geological time and of organic evolution that has occurred within it. It has broad appeal to the public and will be a useful guide for science educators as well."--E. O. Wilson. "My Walk Through Time was an unforgettable experience, awe-inspiring, and humbling...rich in scientific fact and unexpectedly, exquisite humor."--Jane Goodall. A Walk Through Time is a landmark book, gorgeously illustrating the remarkable drama of the history of the universe, from the furious blast of the Big Bang to the first pulse of life on Earth, and on through the rich pageant of life's evolution from primordial microbes to the rise of Homo sapiens. Spanning 15 billion years, the story of life's greatest mysteries emerges here through 130 beautiful four-color illustrations and an absorbing narrative. Combining the knowledge of three expert authors, the text covers the most up-to-date findings, including new understandings about how the universe coalesced into galaxies and planets; how microscopic animals can survive in such superheated environments as deep-sea vents and inside the Earth's core, and the possibility that water came to our planet from space in the form of millions of tiny comets. A Walk Through Time gives readers a new perspective on awe-inspiring processes that produced us and our place in the universe. The companion to a traveling exhibition developed by Hewlett Packard and the Foundation for Global Community. * Lavishly produced by the team that created The Illustrated Brief History of Time. Brian Swimme, Ph.D. (San Francisco, CA), is a cosmologist and the director of the Center for the Story of the Universe at the California Institute of Integral Studies. He is the author of several books, including The Universe Story. Dr. Sid Liebes (Palo Alto, CA) is a senior scientist at Hewlett-Packard Laboratories. Elisabet Sahtouris, Ph.D. (San Francisco, CA) is an evolutionary biologist and consultant to the United Nations.
