Leon van Schaik

Spatial Intelligence: New Futures for Architecture (Architectural Design Primer) Leon van Schaik
The book is organised into three distinct sections that in turn highlight the significance of spatial intelligence for architecture: the first section provides an overview of spatial intelligence as a human capability; the second section argues how the acknowledgement of this capability in architectural education and the profession should enable the demystification of the practice of design, forming the basis of a more democratic interface between society and practice; the final section explores exciting new opportunities for practice in the linking of real and virtual environments in the information age.
