Classical Topics in Complex Function Theory (Graduate Texts in Mathematics)

Reinhold Remmert

Classical Topics in Complex Function Theory (Graduate Texts in Mathematics) Reinhold Remmert An ideal text for an advanced course in the theory of complex functions, this book leads readers to experience function theory personally and to participate in the work of the creative mathematician. The author includes numerous glimpses of the function theory of several complex variables, which illustrate how autonomous this discipline has become. In addition to standard topics, readers will find Eisenstein's proof of Euler's product formula for the sine function; Wielandts uniqueness theorem for the gamma function; Stirlings formula; Isssas theorem; Besses proof that all domains in C are domains of holomorphy; Wedderburns lemma and the ideal theory of rings of holomorphic functions; Estermanns proofs of the overconvergence theorem and Blochs theorem; a holomorphic imbedding of the unit disc in C3; and Gausss expert opinion on Riemanns dissertation. Remmert elegantly presents the material in short clear sections, with compact proofs and historical comments interwoven throughout the text. The abundance of examples, exercises, and historical remarks, as well as the extensive bibliography, combine to make an invaluable source for students and teachers alike

From reader reviews:

Theodore May:

What do you in relation to book? It is not important along? Or just adding material when you really need something to explain what yours problem? How about your extra time? Or are you busy particular person? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They have to answer that question due to the fact just their can do this. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this Classical Topics in Complex Function Theory (Graduate Texts in Mathematics) to read.

Francis Rutland:

Spent a free time and energy to be fun activity to perform! A lot of people spent their spare time with their family, or their particular friends. Usually they performing activity like watching television, planning to beach, or picnic inside park. They actually doing same every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Can be reading a book is usually option to fill your totally free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to consider look for book, may be the book untitled Classical Topics in Complex Function Theory (Graduate Texts in Mathematics) can be good book to read. May be it is usually best activity to you.

Flora Godfrey:

Reading a book to get new life style in this calendar year; every people loves to examine a book. When you go through a book you can get a lot of benefit. When you read guides, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you wish to get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, along with soon. The Classical Topics in Complex Function Theory (Graduate Texts in Mathematics) will give you new experience in studying a book.

Robert Cox:

Many people spending their time by playing outside having friends, fun activity having family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading a book. Ugh, think reading a book can actually hard because you have to take the book everywhere? It ok you can have the e-book, taking everywhere you want in your Cell phone. Like Classical Topics in Complex Function Theory (Graduate Texts in Mathematics) which is finding the e-book version. So , why not try out this book? Let's view.
