## **Waging War: Conflict, Culture, and Innovation in World History** Wayne E. Lee

*Waging War: Conflict, Culture, and Innovation in World History* provides a wide-ranging examination of war in human history, from the beginning of the species until the current rise of the so-called Islamic State. Although it covers many societies throughout time, the book does not attempt to tell all stories from all places, nor does it try to narrate "important" conflicts. Instead, author Wayne E. Lee describes the emergence of military innovations and systems, examining how they were created and then how they moved or affected other societies. These innovations are central to most historical narratives, including the development of social complexity, the rise of the state, the role of the steppe horseman, the spread of gunpowder, the rise of the west, the bureaucratization of military institutions, the industrial revolution and the rise of firepower, strategic bombing and nuclear weapons, and the creation of "people's war."
