During the last 10-15 years biology encountered a transition from hypothesis-driven to data-driven research as exemplified by a vast amount of data deposited on daily basis into various types databases. This transition has been accompanied by development of revolutionary technologies catalyzing emergence of new fields such as comparative and functional genomics, bioinformatics, and systems and synthetic biology. The aim of this textbook is to provide a basic background in these interdisciplinary areas and prepare students for the challenges they will face in their upcoming careers. This black-and-white (low-cost) version of the book is identical with its colored counterpart (ISBN-13: 978-1493731336) that is recommended for those readers, who want to enjoy a full benefit of the provided illustrations.
