Math for Clinical Practice, 2e Denise Macklin RNC BSN CRNI, Cynthia C. Chernecky PhD RN CNS AOCN FAAN, Mother Helena Infortuna MTS BS

Covering the ratio and proportion and formula methods, this comprehensive textbook presents a straightforward, real-world approach to the mathematical calculations used in the clinical setting. It features a unique, step-by-step process that teaches you to identify the information needed to perform a calculation, determine if information is missing, set up and perform the calculation, and check the answer to ensure accuracy. This systematic approach is designed to reduce human calculation errors and ensure patient safety. Common medications and methods of administration are used throughout the textbook, with more than 1,200 practice problems to help you master the math needed for clinical practice.

- All content, examples, problems, and scenarios are clinically based and completely up to date.
- More than 500 full-color illustrations show drug labels, parenteral and oral syringes, medicine cups, pumps, IV equipment, and more that are used in current clinical practice.
- Promotes learning with more than 1,200 practice problems and comprehensive math review problems.
- Safety Alert, Clinical Alert, and Human Error Alert boxes are incorporated throughout to promote safe practice.
- Clinical Connections begin each chapter and explain how that topic relates to clinical practice.
- Examples for each new topic are presented in a unique, step-by-step format: the prescription, what you HAVE, what you KNOW, what you WANT, critical thinking, answer for best care, human error check boxes, and does your answer fit the general guideline? Practice problems follow each set of examples to reinforce your understanding.
- Follows current TJC and ISMP safety recommendations.
- Answer key is new to this edition and provides immediate feedback for practice problems.
- Features the latest drug information in practice problems and photographs.
- Drug Calculations Student Companion, Version 4 will be available on Evolve. It offers practice and application with an interactive tutorial on various topic areas within drug calculations and features over an additional 600 practice problems.

From reader reviews:

Alan Fan:

This Math for Clinical Practice, 2e book is just not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this guide incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. That Math for Clinical Practice, 2e without we recognize teach the one who reading it become critical in considering and analyzing. Don't end up being worry Math for Clinical Practice, 2e can bring once you are and not make your handbag space or bookshelves' turn out to be full because you can have it inside your lovely laptop even phone. This Math for Clinical Practice, 2e having great arrangement in word in addition to layout, so you will not sense uninterested in reading.

Marlon Duenas:

Do you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its protect may doesn't work this is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer is usually Math for Clinical Practice, 2e why because the great cover that make you consider with regards to the content will not disappoint a person. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly guide you to pick up this book.

Allison Carson:

That e-book can make you to feel relax. This particular book Math for Clinical Practice, 2e was bright colored and of course has pictures around. As we know that book Math for Clinical Practice, 2e has many kinds or category. Start from kids until young adults. For example Naruto or Detective Conan you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that will.

Brandi Anderson:

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the professor want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Math for Clinical Practice, 2e can make you experience more interested to read.
