Critical Theory and Animal Liberation (Nature's Meaning)

Critical Theory and Animal Liberation is the first collection to approach our relationship with other animals from the critical or "left" tradition in political and social thought. Breaking with past treatments that have framed the problem as one of "animal rights," the authors instead depict the exploitation and killing of other animals as a political question of the first order. The contributions highlight connections between our everyday treatment of animals and other forms of social power, mass violence, and domination, from capitalism and patriarchy to genocide, fascism, and ecocide.

Contributors include well-known writers in the field as well as scholars in other areas writing on animals for the first time. Among other things, the authors apply Freud's theory of repression to our relationship to the animal, debunk the "Locavore" movement, expose the sexism of the animal defense movement, and point the way toward a new transformative politics that would encompass the human and animal alike.
