Occupy the Future (Boston Review Books)

The Occupy Wall Street movement has ignited new questions about the relationship between democracy and equality in the United States. Are we also entering a moment in history in which the disjuncture between our principles and our institutions is cast into especially sharp relief? Do new developments--most notably the rise of extreme inequality--offer new threats to the realization of our most cherished principles? Can we build an open, democratic, and successful movement to realize our ideals? *Occupy the Future* offers informed and opinionated essays that address these questions. The writers--including Nobel Laureate in Economics Kenneth Arrow and bestselling authors Paul and Anne Ehrlich--lay out what our country's principles are, whether we're living up to them, and what can be done to bring our institutions into better alignment with them.
