Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology))

Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology))

Throughout the world, there is an increasing interest in ecological design of buildings, and natural ventilation has proved to be the most efficient low-energy cooling technique. Its practical application, however, is hindered by the lack of information on the complex relationship between the building and its urban environment. In this book, a team of experts provide first-hand information and tools on the efficient use of natural ventilation in urban buildings. Key design principles are explained, enabling readers to decide on the best solution for natural ventilation of buildings, taking into account climate and urban context. In the initial sketches, architects need answers to open problems such as 'what kind of solution to adopt' and 'how to modify existing strategies to exploit the potential of the site'. This book formalizes the multi-criteria analysis of candidate solutions based on quantitative and qualitative estimation of the driving forces (wind and buoyancy), as well as of the barriers induced by the urban environment (wind speed reduction, noise and pollution) and gives a methodology for optimal design of openings. The book is accompanied by a FREE CD, containing software for assessing the potential of a given site, estimating wind speed and dimensioning the openings for natural ventilation. The methodologies and tools are tested, self-contained and user friendly. About the editors The editors, Cristian Ghiaus and Francis Allard, are affiliated with the University of La Rochelle, France. The authors and reviewers combine expertise from universities, research institutions and industry in Belgium, France, Great Britain, Greece, Portugal and Switzerland.

From reader reviews:

Willie Wilson:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim as well as goal; it means that reserve has different type. Some people truly feel enjoy to spend their the perfect time to read a book. They are reading whatever they consider because their hobby is usually reading a book. How about the person who don't like looking at a book? Sometime, man or woman feel need book after they found difficult problem or perhaps exercise. Well, probably you will require this Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology)).

Clara Bearden:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a move, shopping, or went to often the Mall. How about open as well as read a book titled Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology))? Maybe it is being best activity for you. You know beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with their opinion or you have various other opinion?

Susan Jun:

The book Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology)) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology))? Several of you have a different opinion about publication. But one aim that book can give many data for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or data that you take for that, you could give for each other; you could share all of these. Book Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology)) has simple shape however, you know: it has great and large function for you. You can look the enormous world by start and read a book. So it is very wonderful.

Judith Ellis:

Reading can called head hangout, why? Because if you are reading a book specially book entitled Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar Technology)) your head will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely can be your mind friends. Imaging just about every word written in a reserve then become one contact form conclusion and explanation this maybe you never get before. The Natural Ventilation in the Urban Environment: Assessment and Design (BEST (Buildings Energy and Solar

Technology)) giving you another experience more than blown away your mind but also giving you useful facts for your better life in this particular era. So now let us present to you the relaxing pattern this is your body and mind is going to be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary spending spare time activity?
